CuddleNine

Little Care, Big Love

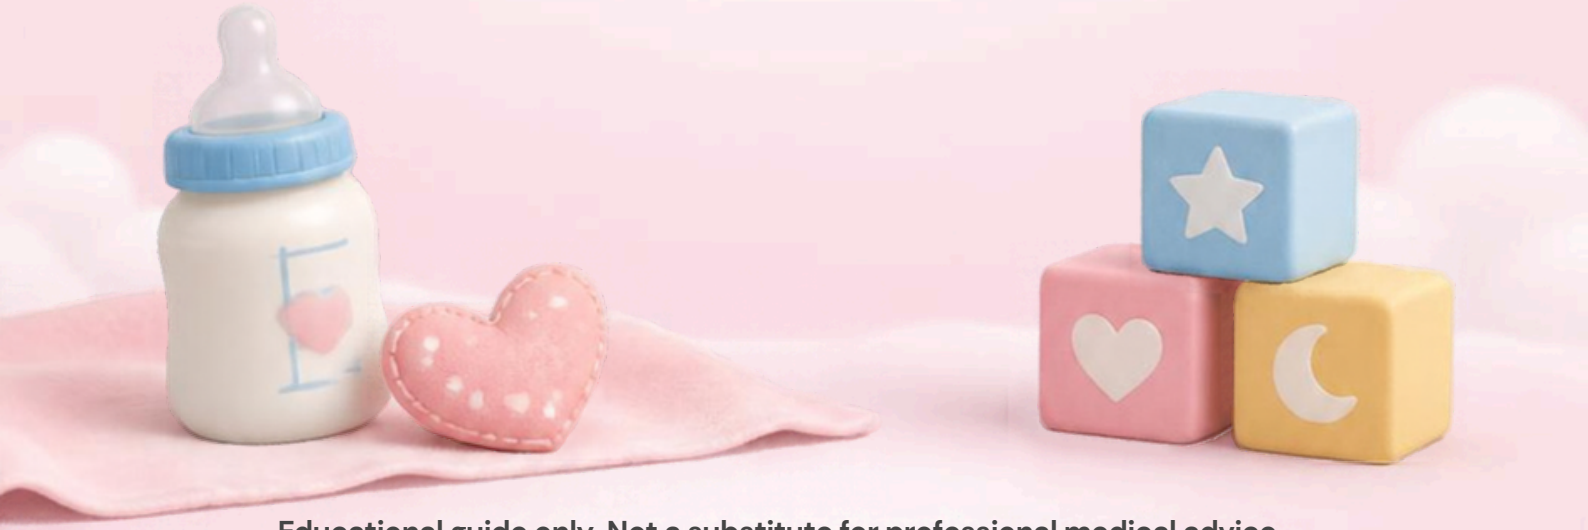
May your baby's first year
be safe, happy, and full of love.



Educational guide only. Not a substitute for professional medical advice.

CuddleNine
Little Care, Big Love

Month 10

Feeding

- 3 meals, 1 snack plus milk
- Light turmeric and cumin is fine
- Still no cow's milk as main drink.

What to Apply / Care

- Brush after the night feed.

Sleep

- Continue a safe, back-to-sleep routine.

Milestones

- Cruising along furniture
- First real words.

Activity

- Safe supervised cruising and talking games.

Mom's Tip

Narrate everyday routines to build language—such as "Now we are washing hands." Keep furniture stable to make cruising safe.

Call the Doctor

Seek medical care if your baby has breathing difficulty, poor feeding, fever, injury, or any developmental concerns.

CuddleNine
Little Care, Big Love

Month 11

Feeding

3 meals, 2 snacks plus milk

Keep avoiding whole nuts, popcorn, chips, juice and honey.

What to Apply / Care

Trim toenails.

Milestones

Walks holding one hand.

Sleep

Continue a safe, back-to-sleep routine.

Activity

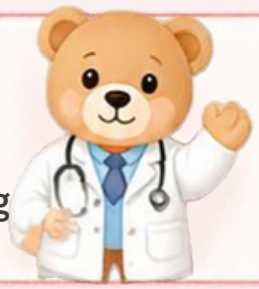
Practice supported walking and simple pointing games.

Mom's Tip

Offer safe finger foods and encourage self-feeding. Praise every effort and exploration.

Call the Doctor

Seek pediatrician guidance if your baby has choking, breathing difficulty, dehydration, fever, or poor feeding



CuddleNine
Little Care, Big Love

Month 12

Happy Birthday

12-month check-up.

Feeding

- Cow's milk may start as per doctor, max 300-400 ml a day
- Family table meals
- Only a taste of birthday cake
- Honey is fine only after the first birthday.

What to Apply / Care

- Brush twice a day.

Sleep

- Continue a safe, back-to-sleep routine.

Milestones

- First steps
- Walking up to 15-16 months is normal.

Activity

- Celebrate with safe family play.

Mom's Tip

Keep your baby's birthday celebration calm, simple and age-appropriate. Familiar people, regular routine and lots of love make it the best gift.

Call the Doctor

Seek medical advice if your baby has breathing difficulty, poor feeding, fever, injury, or any concern about development.

CuddleNine
Little Care, Big Love

Vaccination Chart

India, general schedule

Age	Vaccines
Birth	BCG, OPV-0, Hepatitis B
6 weeks	DPT/pentavalent-1, OPV/IPV-1, Rotavirus-1, PCV-1
10 weeks	Dose 2s
14 weeks	Dose 3s
9 months	Measles-Rubella/MMR-1
12 months	Hepatitis A

Always follow your pediatrician's schedule and keep the vaccination card safe.

Mom's Tip

Mild fever after shots is common. Give medicine only as the doctor advises.

Call the Doctor

- Fever above 102°F
- Persistent crying or consolable
- Swelling, redness or pus at site
- Breathing difficulty
- Fainting or unusual sleepiness

CuddleNine
Little Care, Big Love

Red Flags

When to see a doctor

Call the Doctor

- Breathing difficulty or blue lips
- Fever 100.4F or higher in a baby under 3 months
- Refusing feeds
- **Repeated, green or bloody vomit**
- Dehydration: dry mouth, no urine for 6+ hours, sunken soft spot
- Seizures
- Worsening jaundice
- Red or smelly umbilical cord
- **Inconsolable crying for 3+ hours**
- **Head injury with vomiting or drowsiness**

Emergency numbers:

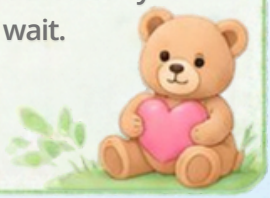
108
ambulance (India)
or local number.

What to do – Step by Step

1. Notice the sign
2. Keep baby safe
3. Call for help
4. Follow medical advice

Mom's Tip

Trust your instincts. If something feels wrong, it's always better to get your baby checked early than to wait.



Printable Checklists

Feeding Tracker

Date	Time	Breast / Bottle / Solids	Amount or Duration	Notes

Today's notes

Mom's Tip

Follow your baby's hunger and fullness cues, and ask your pediatrician if feeding concerns continue.

Call the Doctor

Seek medical help if your baby repeatedly refuses feeds, has breathing difficulty, or shows signs of dehydration.

CuddleNine

Little Care, Big Love

Month 4

Feeding

Milk only

Feed in a quiet room.

What to Apply / Care

Teething may start

Offer a sterilized silicone teether.

Sleep

14-15 hours

Sleep regression is common.

Milestones

Rolls over

Never leave baby alone on a bed.

Activity

Tummy time up to 10 minutes.

Mom's Tip

Teething can make baby fussy—supervise teething at all times and clean the teethers regularly. Daily tummy time builds strong muscles and supports milestones.

Call the Doctor

Contact your doctor if your baby has fever, breathing difficulty, poor feeding, or any safety concerns.

CuddleNine
Little Care, Big Love

Month 5

Feeding

- Milk only
- Ask the doctor about iron drops.

Ask the doctor about iron drops.

Ask the doctor about iron drops.

What to Apply / Care

- No teething gel without doctor advice
- Hair oil at most twice a week.

Sleep

Continue a safe, back-to-sleep routine.

Milestones

- Grasps objects
- Brings feet
- to mouth.

Activity

Rattles and clapping games.

Mom's Tip

Enjoy simple, supervised sound-and-clap games. They help your baby learn, bond, and have fun!

Call the Doctor

Please ask your pediatrician before giving iron drops or teething gel. Also for any feeding, breathing, or fever concern.

CuddleNine
Little Care, Big Love

Month 6
SOLIDS BEGIN

Feeding

- Start with 1-2 spoons: dal water, mashed banana, apple or carrot puree, thin rice or ragi porridge
- One new food for 3 days at a time
- Watch for rash, vomiting or loose stools
- Keep breastfeeding
- Avoid honey, salt, sugar, whole nuts, juice, cow's milk as a drink.

What to Apply / Care

- Sit baby upright to feed
- Never leave baby alone
- Wipe face after meals.

Sleep

Continue a safe, back-to-sleep routine.

Milestones

- Sits with support
- Babbles.

Activity

Practice supported sitting and explore soft, age-appropriate textures.

Mom's Tip

Offer one new food at a time and watch baby's response.

Call the Doctor

Stop the new food and call your pediatrician if there is a rash, vomiting, or loose stools. Never leave baby alone while eating.

Month 7

Feeding

- 2 meals plus milk
- Mashed khichdi, porridge without sugar, fruit
- Well-cooked egg only with doctor advice
- Sips of water from a cup.

What to Apply / Care

Keep meals soft and supervised; wipe hands and face after eating.

Sleep

Continue a predictable safe-sleep routine.

Milestones

Sits without support.

Activity

Practice cup sips and supported floor play.

Let your baby explore a cup while seated upright. It builds confidence and supports independent feeding.

Call the Doctor

Always ask your pediatrician before introducing egg. Seek advice if your baby has poor feeding, vomiting, breathing difficulty, or fever.

Month 8

Feeding

- 2-3 meals plus milk
- Finger foods like steamed carrot sticks and banana pieces
- Curd.

What to Apply / Care

- Baby-proof the house: socket covers, soft table corners, no small objects on the floor
- Mosquito net
- Shade rather than strong sun.

Sleep

- Continue a safe, back-to-sleep routine.

Milestones

- Crawling begins.

Activity

- Supervised floor play and safe reaching games.

Mom's Tip

Keep the home safe today, so your baby can explore happily tomorrow.

Call the Doctor

Seek pediatrician guidance for fever, breathing difficulty, poor feeding, dehydration, or any safety concern.

CuddleNine
Little Care, Big Love

Month 9

Feeding

- 3 meals plus milk
- Family food without chili and extra salt
- Soft roti pieces
- Crumbled paneer.

What to Apply / Care

- Choking harards to avoid:
- whole nuts, grapes, popcorn
- Brush with water and soft brush
- Fluoride toothpaste only as per doctor
- No round baby walkers.

Sleep

Continue a safe, back-to-sleep routine.

Milestones

- Pulls up to stand
- Waves bye-bye
- Plays peekaboo.

Activity

Safe supervised cruising and peekaboo games.

9-month vaccines as per doctor.

Mom's Tip

Cut food into small, soft pieces. Supervise your baby every meal.

Call the Doctor

Seek immediate medical help if your baby has choking, breathing difficulty, repeated vomiting, fever, or dehydration.

CuddleNine
Little Care, Big Love

Month 3

Feeding

Milk only
3-4 hour gaps.

What to Apply / Care

Daily gentle massage
Use fragrance-free lotion if skin is dry.

Sleep

14-16 hours.

Milestones

- Opens and closes hands
- Laughs
- Turns to sounds.

Activity

Show colorful toys
20-30 cm away.

Mom's Tip

Follow your baby's cues during play and massage. Stop if baby looks away or seems tired.

Call the Doctor

Contact your pediatrician for any concerns about feeding, breathing, fever, or unusual development.

Before You Start

Every baby is different. This guidance is general.

Ask your pediatrician before starting any new food, medicine, drops, oil or cream.

Give exclusive breast milk (or doctor-advised formula) for the first 6 months, then start solids and continue breastfeeding.

ALWAYS put baby to sleep on the back in an empty flat cot with no pillows or soft toys.

Never leave baby alone while bathing, eating or on a high surface.

Mom's Tip

Call the Doctor

First 24 Hours

Hour by hour

Hours 0-2

Baby on mother's chest skin-to-skin

Start breastfeeding within the first hour

First milk is colostrum (thick, yellowish)

Apply nothing — no powder, oil or lotion.

Mom's Tip

Skin-to-skin and early breastfeeding help baby stay warm, healthy and calm.

Call the Doctor

If the baby looks yellow in the first 24 hours, it is NOT normal. Tell the doctor or hospital immediately.

Hours 2-6

First stool is black-green meconium and is normal

Keep the umbilical stump dry; apply nothing; fold the diaper below it

Wake baby every 2-3 hours to feed.

Mom's Tip

Gentle care keeps the stump clean and helps prevent infections.

Hours 6-12

Cap, mittens and socks

First urine within 24 hours

Use cotton and lukewarm water for cleaning, no wet wipes

Only breast milk — no water, honey or ghutti.

Mom's Tip

Breast milk has all the nutrition and protection your baby needs.

Hours 12-24

Sponge bath only until the cord falls off

8-12 feeds; feed on demand

Call the Doctor

If the baby looks yellow in the first 24 hours, it is NOT normal. Tell the doctor or hospital immediately.

Red Flags

Trouble breathing or blue lips

Temperature 100.4F (38C) or higher, or below 97F

Not feeding for 4+ hours

No urine in 24 hours

Yellow skin in the first 24 hours

CuddleNine

Little Care, Big Love

Month 1

The Adjustment Month

Feeding

- Breast milk or formula only
- 8-12 feeds a day
- No water, honey or glucose.

What to Apply / Care

- Keep the cord stump dry; it falls off in 1-2 weeks
- Use cotton and lukewarm water; no soap for 2-3 weeks
- Use zinc oxide cream for diaper rash
- Massage after 2-3 weeks with coconut or sesame oil after a patch test.

Sleep

- 14-17 hours.

Milestones

- Eyes begin to focus
- Reacts to sound.

Activity

- Skin-to-skin and lullabies.

Mom's Tip

Gentle skin-to-skin cuddles and a calm routine help your baby feel safe and loved.

Call the Doctor

Fever 100.4F or higher, poor feeding, very sleepy, or fast breathing: see doctor.

Month 2

6-week vaccines

Feeding

- Milk only
- Burp after feeds.

What to Apply / Care

- Gentle baby wash daily or on alternate days
- For cradle cap: apply coconut oil for 15 minutes, then use a soft brush
- Trim nails.

Sleep

Milestones

- First social smile and cooing.

Activity

- Tummy time for 2-3 minutes while awake.

Mom's Tip

Short, supervised tummy time builds strength. Smile and talk to your baby—your face is their favorite toy.

Call the Doctor

Ask your pediatrician promptly about any feeding, breathing, fever, or unusual sleepiness concerns.
